

ESI Therapeutic Formulary Prescription Drug Listing for Plan Members

Product Document

The following listing of drugs is intended as a guide for your physicians to assist them in prescribing drugs that are covered under the ESI Therapeutic Formulary (ETF).

This formulary includes a list of eligible drugs indicated for many illnesses and conditions found in the working population. The drugs included in this formulary have been reviewed clinically to ensure that they are effective and affordable. It is important to note that not every disease state is covered.

The drugs may be classified under more than one category. Most dosage forms for the listed drugs are included in the formulary (e.g., slow release tablets, oral liquids).
